- ii. Monthly active user data is extracted from Google Analytics and rounded to the nearest thousand, the computation method and basis of which have not been verified. The data for App Only users could be overlapping if the user re-installs the HKTVmall App on the same device or amends the advertising ID of its device in the same month.
The information for the same period can be changed at different points of time when capturing the data as Google Analytics performs the analysis on a sampling basis. According to Google Analytics, "Active User" is defined as the unique user who initiated sessions on the website or App within the selected date range.
