

HKTV Public Speaking Workshop

HKTV has always been committed to unleashing the inner potential of every Talent and cultivating promising Talents to become future leaders. We organize speaking workshops for our Talents, inviting external speaking coaches to provide intensive training. Our management also serves as mentors to guide the participating Talents, helping them master the keys of delivering public speaking.

This workshop concludes with a public speaking contest, providing Talents with the opportunity to put their skills into practice. This also allows them to observe and learn from the different speaking styles of their peers, which they can then apply in their daily work, making their day-to-day tasks more seamless.
