

## HKTV Held AI Workshop for Talents

HKTV is committed to bringing more positive changes to society through technology. To equip our Talents with the ability to utilise AI, we have invited the founders of DotAi.HK to our Tseung Kwan O headquarters and hold an AI workshop. We have discussed how to train AI, use AI to prepare social media posts, and acquire traffic on social media. Several practical sessions were included, which allowed our teams to have in-depth training.

HKTV always organises different workshops in response to market changes and unleash the potential of our Talents. It helps nurture Talents with advanced minds and lead the Group to become the industry leader!
