Talent Training -
Compliance and Security Workshops

HKTV holds compulsory workshops for designated roles to ensure they are well-informed about the latest guidelines, revised regulations, and new online trends.

HKTV organised the Compliance and Security Carnival, which included a series of compulsory workshops on personal data protection, Unsolicited Electronic Messages Ordinance (UEMO), internal controls, and cybersecurity. Each session was led by professionals from different internal teams who delved into specific regulations. Through case studies and group discussions, Talents could gain a clear understanding of the new regulations relevant to their roles.
